SKILLS

Methodologies: Agile, Waterfall, SDLC, Scrum
Web/Application Servers: JSP, AWS, Servlets
Programming Languages: Java, C#, VB.NET, JavaScript, HTML, CSS, Python, SQL (T-SQL, Pl/SQL)
Frameworks/Libraries: React.js .Net, ASP.Net, Angular.js, Entity Framework, Spring boot
Cloud Platforms: AWS, Azure
Management: SQL Server, MySQL, Oracle, PostgreSQL
Cloud Technologies: CI/CD, Azure DevOps, Power BI, SSRS, SSIS
Web Services: RESTful API, SOAP
Version Control: GIT, SVN, GitHub
Front-end Technologies: MVC Blazor, Bootstrap, jQuery, Ajax
IDEs/Tools: Visual Studio, IntelliJ IDEA, Eclipse, Visio, Project
Testing: Selenium, TDD, JUnit
Operating Systems: Windows, Linux, UNIX

EDUCATION

Master of Science in Computer Science,

Northern Arizona University, Flagstaff, Arizona, USA

Aug 2022 – Dec 2023

Bachelor of Technology in Electronics and Communication Engineering,

Veltech University, Chennai, India

Jun 2018 – May 2022

ACHIEVEMENTS

- International Excellence Achievement Award – NAU

SUMMARY

Full Stack Developer with 4+ years of experience designing and delivering scalable enterprise applications using .NET 8, ASP.NET, Web API, C#, Python, and Java. Strong front-end expertise in building responsive user interfaces using React, JavaScript, HTML, CSS, and Bootstrap, with a focus on usability and performance. Proven ability to develop secure RESTful APIs, microservices, and third-party integrations using JSON, XML, LINQ, Entity Framework, and Redux. Experienced in database design, optimization, and data migration across SQL Server, PostgreSQL, SSIS, and ETL. Adept in cloud and DevOps practices, including Azure, AWS, Git/GitHub, automated testing, and Agile development.

EXPERIENCE

Application Developer; Parallon (HCA Healthcare) | USA Jan 2025 – Present

- Developed two enterprise healthcare web applications using .NET 8, Blazor, and ASP.NET MVC, delivering secure and scalable solutions across Development, QA, and Production environments.
- Built responsive front-end interfaces with Telerik UI for Blazor and Kendo UI for MVC, improving usability and consistency for complex healthcare workflows.
- Implemented RESTful Web APIs using JSON, XML, and LINQ, enabling efficient and reliable front-end and back-end integration.
- Designed, optimized, and maintained database logic across SQL Server and PostgreSQL, including complex queries, stored procedures, views, and performance tuning as part of a data platform migration initiative.
- Developed, scheduled, and monitored SSIS and ETL jobs to ensure accurate and consistent daily data ingestion across multiple teams.
- Implemented an automated email sending system in the application, generating dynamic Excel attachments, reducing manual effort and improving efficiency.
- Designed and developed interactive web pages using HTML, CSS, Bootstrap, JavaScript, jQuery, and JSON, aligned with business and UI standards.
- Deployed and supported applications on IIS and Azure using Visual Studio 2022 and Git/GitHub, following coding standards and production support.

Full Stack .Net Developer; Wells Fargo, CA | USA Feb 2024 – Dec 2024

- Designed 3 robust APIs for integrating with 3rd party financial systems & data sources, reducing data integration time by 20%.
- Developed and maintained complex .NET applications for financial data management, reporting, and analysis, resulting in a 15% improvement in data processing efficiency.
- Incorporated GitHub for version control, code collaboration, and continuous integration, reducing code integration issues by 30%.
- Merged the Model-View-Controller pattern to implement microservices for user authentication RESTful APIs with the help of ASP.NET and accelerated the development of APIs upon joining the team.
- Delivered RESTful APIs and enhanced database operations using Entity Framework and SQL Server, improving database performance by 30%.
- Enhanced React application stability and data consistency through Redux optimization.
- Implemented Test Driven Environment using JUnit, resulting in a 25% improvement in code quality and a 30% reduction in post-release defects.

Software Developer; CGI, Hyd | India Jul 2020 – Aug 2022

- Implemented business logic, automated workflows, and handled XML using Python, Django, Java, Node.js, and AngularJS.
- Developed and tested dashboards, APIs, and client applications for analytics and reporting using AWS, MySQL, and Python 3.
- Managed version control with Git, coordinated via Jira/GitHub, and deployed applications on AWS EC2.
- Wrote and tested 50+ unit tests and automated integration tests, achieving a 90% code coverage rate.
- Performed CI/CD workflows using automation tools by Jenkins, Maven for building scripts, and configured log4j.
